

QUICK, TRACEABLE RESULTS

One of the many benefits of CableQ testing is that it provides a traceable measurement.

Testing is non-destructive and provides a finite number, which means utilities can retest to see how cables are aging and whether rejuvenation attempts have worked.

BENEFITS OF CABLEQ TESTING

Immediate results

Testing results on-site for real-time decisions

Non-destructive

Testing can be repeated without damaging cables

Measurement

Testing provides a finite number to monitor cable health change and better inform your choices

Contact us today to find out more about how CableQ can help you manage your assets with cable testing.
